

## Instructions for printing customized posters and flyers

If you have any trouble, please drop a note to [booking@davidlamotte.com](mailto:booking@davidlamotte.com).

1. Open a new document in your preferred layout or word processing software (Microsoft Word, Pages, Quark, etc.) of the same size and orientation as the poster or flyer you want to print.
2. Download the pdf of the corresponding size and place it in the document with a half-inch margin around each side.
3. Create a text box over the green box at the bottom of the poster and put whatever text you desire in it. Normally, the data needed is:

In large type:

- Day and date of show
- Venue name

In small type:

- Time of show
- Venue address
- Admission price
- Phone number for more information. *Please note that this is the phone number people will call if they are lost and need directions, so it should be a number that will be answered near the show time as well as in the days leading up to it.*

4. Print as many copies as you need and distribute them widely!
